

AT&T Generator Platform Ordering Guide

1-800-453-0050

www.emiproductions.com

11230 Neeshaw Drive, Houston, Texas 77065

Overview:

All generator platform solutions are designed to accommodate all generators up to 50KW. These platforms can handle sizes up to 95"X38"X101" and an operating weight of 6,500 lbs.

The platforms arrive from the factory ready to assemble, making installation a breeze. With gravity feet that can be placed on-grade without any anchoring, the installation time and material costs are significantly reduced. Generator placement at any site can be completed within a couple of hours using this platform solution.

There are two elevated Platform models available: 0567 and 0571. Both models offer elevations ranging from 4' to 20' in 2' increments. For access options, we provide standard and preferred stairs with landings or a gated safety ladder for locations with real estate constraints. Additionally, the optional THERN 500 lb. crane makes refueling and other service functions much easier.

192" x 120" Generator up to 50 kW Elevated Platform with Stairs
